

HYUNDAI TUCSON (48V optional)
SUV, 5 doors
As of October 2020

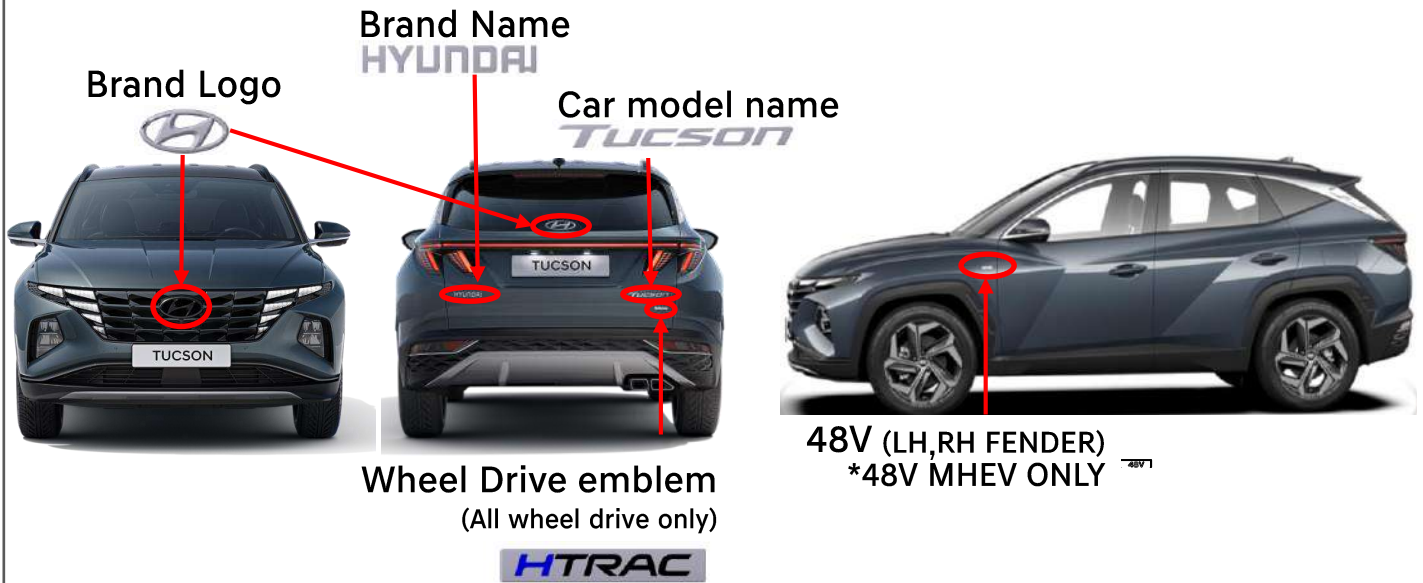

Driver only

Optional
48V
Li-ion

	Airbag		Stored gas inflator		Seat belt pretensioner		SRS control unit		Pedestrian protection active system
	Automatic rollover protection system		Gas strut/Preloaded spring		High strength zone		Zone requiring special attention		
	Battery low voltage		Ultra capacitor, low voltage		Fuel tank		Gas tank		Safety valve
	High voltage battery pack		High voltage power cable/component		High voltage disconnect		Fuse box disabling high voltage system		Ultra capacitor, high voltage

1. Identification / recognition

2. Immobilisation / stabilisation / lifting

■ Completely immobilize the vehicle

1. Chock the wheels and pull the switch to set the parking brake.
2. For automatic vehicles the shift lever or shift button to the park (P) position.

■ For stabilize vehicle, crib at four points directly under the front and rear pillars using wooden blocks or equivalent objects

Do not place cribbing such as wooden blocks or rescue air lifting bags under the exhaust system, fuel system or high voltage power cables. The failure will cause of fire, electric shock or gas leak.

3. Disable direct hazards / safety regulations

■ Access to the 12V battery

12V

12V

1. Pull the release lever to unlatch the hood. The hood should pop open slightly.

2. Raise the hood slightly, push the secondary latch up (①) inside of the hood center and lift the hood (②)

3. Battery(⑧) in the engine room

■ Disabling procedure

12V

① Turn the ignition switch off

② Disconnect the negative(-) terminal

③ Disconnect the positive(+) terminal

■ Access to the 48V battery

48V

After opening the trunk, remove the luggage cover

After opening the luggage cover board remove luggage foam.

There is inlet/outlet duct and 48V battery system.

■ Disabling procedure

48V

· Location: in the trunk

· To disconnect 48V battery, follow steps:

- ① Wait about 10 minutes after you turn off the engine.
- ② Disconnect the (-) cable from 12V battery in the hood.
- ③ Disconnect the 12V (+) cable from 48V Battery pack.
- ④ Disconnect the 48V (-) cable and (+) cable in order.
- ⑤ Disconnect the BMS EXTN wire.

4. Access to the occupants

■ Glass

1 : Laminated

2-5 : Tempered

■ Vehicle body

Hardened Steel

■ Seat adjustment

MANUAL

POWER

■ Steering column adjustment

5. Stored energy / liquids / gases / solids

 	  	max. 54L
	  	12 V
 LI ION	   	48 V

6. In case of fire

■ Gas Strut

- Risk of missile effect of hood and trunk.

It is recommended to allow the 48V Li-ion battery to burn itself out if it is judged that it is difficult to apply copious amounts of water to the high voltage battery. In this case, protection of the environment from smoke must be managed.

7. In case of fire

Do not touch any of the 48V components or cables, as doing so poses an electrocution hazard. Work on the vehicle only after the vehicle has been pulled out of the water.

8. Towing / transportation / storage

OK :

dollies

dollies

Notice: AWD (All Wheel Drive) vehicle must be towed with all wheels off the ground, either on a flatbed tow truck or using dollies.

Not OK :
